

ChM produces and distributes advanced medical solutions in 3 main divisions:

Comprehensive portfolio of products for traumatology, including systems designed for fractures fixation and deformities correction of extremities and pelvis.

Wide range of advanced solutions for cervical and thoraco-lumbar stabilization of spine, including pedicle screw systems for open and MIS procedures, various interbody devices and fixation plates.

Instruments and implants for cranio-maxillofacial surgeries, dedicated for fracture fixations, reconstructions, distractions and orthognathic surgeries.

TRANSPALATAL DISTRACTOR

TRANSPALATAL DISTRACTOR

Maximized safety

- blocking screw secured - eliminated swallowing or choking possibility
- compact design - no free distractor elements like bone plates or blocking screw
- patient-side identification system - color coding and additional R/L markings

Minimized dimensions

- patient friendly
- optimized mechanical strength
- facilitated application and activation

Multiple distractor options

- system consists of 4 implant sizes
- different variants of distraction length

Stabilizing spikes

- secure anchoring
- stable position of the distractor

Measuring trials

- facilitated distractor size selection
- reduced operative time

Self-drilling bone screws

- facilitated screw insertion
- reduced operative time and efficient procedure
- Plus Drive - excellent self-retaining feature and improved torque transmission

Comprehensive instrumentation

- full range of complementary devices
- ergonomic design of devices
- compact and transparent stand

Maximized safety

Stabilizing spikes

Articulated mechanism
