

ChM produces and distributes advanced medical solutions in 3 main divisions:

Comprehensive portfolio of products for traumatology, including systems designed for fractures fixation and deformities correction of extremities and pelvis.

Wide range of advanced solutions for cervical and thoraco-lumbar stabilization of spine, including pedicle screw systems for open and MIS procedures, various interbody devices and fixation plates.

Instruments and implants for cranio-maxillofacial surgeries, dedicated for fracture fixations, reconstructions, distractions and orthognathic surgeries.

To bring medical solutions

MICROSYSTEMS

Transpalatal Distractor

- maximized safety, compact design - no free distractor elements like bone plates or blocking screw
- minimized dimensions

Multiple plate options

- implants dedicated for applications in trauma surgeries, orthognathics, orthodontics and neurosurgery
- different variants of strength and rigidity

Multiple screw options

- self-tapping, self-drilling and emergency screws
- different variants of diameters
- Plus Drive - excellent self-retaining feature and improved torque transmission

Individual implants

- improved operative procedure and outcomes
- restoration of mechanical and aesthetic functions
- complete set of implants, templates and information sheets
- SLM technology
- certified, biocompatible materials

Comprehensive instrumentation

- full range of complementary devices
- ergonomic design of devices
- compact and transparent stand

Angular screwdriver

- designed for intraoral surgeries
- convenient in osteosyntheses, orthognathics and orthodontics
- reduced head dimensions
