

ChM produces and distributes advanced products in 3 main divisions:

Comprehensive portfolio of products for traumatology. Including systems designed for fractures fixation, deformity corrections associated with extremities and pelvis.

Wide range of advanced products for cervical and thoraco-lumbar stabilization of spine. Including pedicle screws systems for open and MIS procedures, various interbody devices and plates.

Medical devices and implants for cranio-maxillofacial. Dedicated for fracture fixations, reconstructions, distractions and orthognathic surgeries.

STRAIGHT TUBULAR PLATES

STRAIGHT TUBULAR PLATES

Design aligned with the anatomy

- optimized anatomical profile
- facilitate anatomical reduction

Beveled tip

- easy percutaneous insertion

Locking hole design

- the screws heads do not protrude above the surface of the plate what significantly reduces tissue irritation
- increased strength of the screw-to-plate threaded connection

Compression hole

- oblong hole for plate positioning
- compression in two directions possible

K-wire holes

- provisional plate positioning

Multiple screw options

- non-locking, locking and VA locking screw gives multiple configuration for individual cases

Variable-Angle screws

- high strength cobalt alloy material
- compatible with all locking holes
- 30° angulation cone
- VA screw re-lock possibility
