

ChM produces and distributes advanced medical solutions in 3 main divisions:

Comprehensive portfolio of products for traumatology, including systems designed for fractures fixation and deformities correction of extremities and pelvis.

Wide range of advanced solutions for cervical and thoraco-lumbar stabilization of spine, including pedicle screw systems for open and MIS procedures, various interbody devices and fixation plates.

Instruments and implants for cranio-maxillofacial surgeries, dedicated for fracture fixations, reconstructions, distractions and orthognathic surgeries.

FOREARM STRAIGHT PLATES

FOREARM STRAIGHT PLATES

Design aligned with anatomy

- optimized anatomical profile
- facilitated anatomical reduction

Chamfered plate borders

- minimized soft-tissue irritation
- improved stress distribution

Bottom undercuts of the shaft part

- limited bone-to-plate contact
- better blood circulation of periimplant tissues

Beveled tip

- easy percutaneous insertion

Compression hole

- oblong hole for plate positioning
- compression in two directions possible

K-wire holes

- provisional plate positioning

Multiple screw options

- non-locking, locking and VA locking screw gives multiple configuration for individual cases

Variable-Angle screws

- high strength cobalt alloy material
- compatible with all locking holes
- 30° angulation cone
- VA screw re-lock possibility
